

Acknowledgment of Risk Form

I,, with unitholder number..... wish to invest in the **Principal Twin Structured Complex Return 1Y1 Fund (PRINCIPAL TWIN1Y1)**, which is a Mixed Fund with a one-time investment strategy (buy-and-hold).

I understand and acknowledge the characteristics, investment policy, investment strategy, risks, and returns relevant to the investment units of the fund, as detailed below.

1. The Principal Twin Structured Complex Return 1Y1 Fund is a high-risk or complicated investment product. Therefore, different from investing in general mutual funds.

The fund will invest in

Part 1: Investing in government bonds, corporate bonds, and deposits both domestically and abroad with investment-grade credit ratings, comprising approximately 97% - 99% of the fund's net asset value, this portion will increase to 100% at maturity.

Part 2: The remaining investment is approximately 1% - 3% of the fund's net asset value will invests in an Option contract or Warrant, that payout is based on the performance of the Nikkei 225 (NKY index).

2. Conditions for paying investment capital* and returns of the fund at the maturity date

Event	Conditions	Principal includes net return on investment at maturity
Scenario 1	The underlying index closing level on any business day (before or on the exercise date) has been either greater than +20% or less than -20% of the underlying index closing level on the trade date. ($X < -20\%$ or $X > +20\%$)	1. Principal + 2. Rebate amount Rebate amount in THB = Rebate Rate x Principal x the exchange rate ratio.
Scenario 2	The underlying index closing level on the exercise date decreases by -5% to -20% of the underlying index closing level on the trade date. ($-20\% \leq X \leq -5\%$) In-The-Money	1. Principal + 2. Option/Warrant payoff Option/Warrant payoff in THB = (Participation rate x Change in the underlying x Principal x the exchange rate ratio
Scenario 3	The underlying index closing level on the exercise date increases by +5% to +20% of the underlying index closing level on the trade date. ($+5\% \leq X \leq +20\%$) In-The-Money	1. Principal + 2. Option/Warrant payoff Option/Warrant payoff in THB = (Participation rate x Change in the underlying x Principal x the exchange rate ratio
Scenario 4	The underlying index closing level on the exercise date decrease or increase less than 5% of the underlying index closing level on the trade date. ($-5\% < X < +5\%$) Out-of-The- Money	1. Principal + 2. Rebate amount Rebate amount in THB = Rebate Rate x Principal x the exchange rate ratio.

Principal = the initial investment amount after deducting any front-end fees and switching-in fees.

Note:

- In case that any event, which effect to investment conditions and calculation methodology from investing in option or warrant, occurs, for example the contract is cancelled by issuer due to extremely high volatility market conditions that the issuer cannot issue with original conditions, which force the fund to change issuer, the return calculation must be with the terms specified in the option or warrant contract the fund invested in. And the asset management company will inform unitholders of such conditions within 15 days from the date that event occurs through company's website.

In alliance with  CIMB

- 3. Investor can not redemption orders during approximately 1 Year from the registration date until the maturity date. Therefore, if there are negative factors, it will affect the investment unit. Investors may lose a large amount of investment.
- 4. The Fund has a policy of investing in derivative, option contract or warrant that are referenced to the underlying index. This fund is more complex and has higher risk than general fixed income funds, the conditions for compensation and repayment of principal in whole or in part are based on various factors as specified in the regulations. The Investors should understand of risks and should take into the investment experience, investment objectives, and financial status, including investors must be able to accept the risks that may arise from investing.
- 5. The fund does not guarantee the price or return on investment and there is no principal protection or principal protection less than 100 percent of the investment. Therefore, if the prediction of the direction of the price of the underlying security is wrong, this may cause investors to receive returns that are not as expected or may loss of some or all of money.

I acknowledge that any information given in this document is initial information about relevant risks, and that I have carefully studied the **Principal Twin Structured Complex Return 1Y1 Fund**, including its conditions for payment of returns, and risk and investment precaution, which are provided in the prospectus I have been given. I have received the prospectus, the summary prospectus before I make my investment decision. I agree to be completely bound by the terms and conditions set out in the prospectus produced by the asset management company.

Investors should seek additional advice from the company's officers before making their investment decision, and should thoroughly understand the general characteristics of mutual funds, including their conditions, returns, and risks.
